

# Presents

**Dirt!** The Movie is an insightful and timely film that tells the story of the glorious and unappreciated material beneath our feet. Inspired by William Bryant Logan's acclaimed book *Dirt: The Ecstatic Skin of the Earth*, **Dirt! The Movie** takes a humorous and substantial look into the history and current state of the living organic matter that we come from and will later return to.

**Dirt The Movie will make you want to get dirty!**

**Our Soil in Nova Scotia is a precious and underappreciated resource. How we treat soil is crucial to reducing greenhouse gases and use of energy. Soils are a source of energy. We do not need to destroy living soils to meet our energy needs.**

**Join Us for a screening with an introduction from Taproot Farms, BALLE-NS, and Slow Food Nova Scotia.**
